Professional Summary

Self-taught Software Developer with hands-on experience building web applications, automation systems, and trading software solutions. Skilled in JavaScript, React, Node.js, and MetaTrader development (MQL4/MQL5). Passionate about building scalable systems, solving real-world problems, and continuously learning new technologies.

Experience includes developing client websites, trading tools, and business systems with a strong focus on performance and usability.

Experience

Software Developer, *Freelance*

2023 – Present

- Built websites and systems for clients using modern web technologies
- Developed trading automation tools for MetaTrader platforms
- Collaborated with clients to design and implement software solutions
- Maintained and improved existing systems
- Managed deployment using Git and Netlify

Education

Self-Taught Software Engineer

Focused on: Web development, Trading systems development, Backend development basics, Software engineering principles

Technical Skills

Programming Languages

- JavaScript (Advanced)
- Python (Basic knowledge)
- C++ (Basic understanding via MQL4/MQL5 foundation)
- SQL (Basic)
- MQL4 / MQL5 (MetaTrader development)

Backend Development

- Node.js
- Express.js
- REST APIs
- Basic database integration (MySQL)

Frontend Development

- React.js
- HTML5 & CSS3
- Tailwind CSS
- Responsive Web Design

Tools & Platforms

- Git & GitHub
- MetaTrader 4 & 5
- VS Code
- Netlify
- Linux basics

Projects

Trading Automation Systems (MT4 / MT5)

- Developed multiple trading systems and expert advisors using MQL4 and MQL5.
- Features: Automated trade execution, Risk management systems, Custom trading logic, Strategy backtesting and optimization.

Trading Alert System

- Built a real-time alert system for traders to notify them of market conditions.
- Features: Custom price alerts, Market condition triggers, Lightweight execution system.

Web Development Projects

- Designed and developed modern responsive websites for clients and personal projects.
- Technologies: React.js, JavaScript, HTML, CSS

Safari & Travel Web Systems

- Built web-based solutions for travel and safari-related businesses.
- Features: Tour information systems, Booking interfaces, Inquiry management.

Additional Information

- Strong problem-solving skills
- Fast learner with ability to adapt quickly to new technologies
- Fluent English communication
- Experience working independently on real-world projects
- Open to remote and international opportunities
